

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Newly retired, after spending several years working with his brother to build their crane business into an industry leader, John had no idea that important trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road trip.

During their trip, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers had been unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could quickly and securely lift individuals in the air to accomplish maintenance and other construction functions.

Upon returning from their travels, John formed a partnership with two friends and purchased a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they built and sold the first JLG aerial work platform. The company incorporates some of the basic design essentials of that original lift into current designs.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country journey and since the first JLG aerial platform entered the market. As of today, the company has extended itself into a number of international markets and continues to develop modern machinery to ensure that consumers are able to become safer and more well-organized within their workplace.
